NEW HAVEN NURSERIES

Fall
1930

**J. BAGBY AND SONS COMPANY
NEW HAVEN, MISSOURI**

Just About Ourselves

Fifty-nine years have been spent in building up our nursery business at New Haven. It was established in 1872 by Julian Bagby and has continued under Bagby management ever since. Our employees have grown up in the business and are honored citizens of the community. We state this fact that our customers may know that their orders are handled by responsible men. All of the trees we offer are grown on our own land and under our own care. We are proud of our record of the orchards that are growing in every state from the trees we have produced. Some of our customers have been with us for more than forty years, and we expect to keep right on serving a larger circle of new customers every year with Bagby quality trees. This list contains only the standard, time-tried and tested varieties.

Our years of experience in the nursery business has taught us that our customers like our way of doing business, for they know that we do not exaggerate the merits of our varieties. We produce good stock, true-to-name, pack it well, ship it promptly and in good condition, and charge only reasonable prices. Let us fill your order.

The Way We Do Business With You

Terms Cash, unless otherwise agreed upon. All orders to be sent C. O. D. must be accompanied by one-fourth the amount in cash. Remit by Money Order, Cash or Check. When cash is sent be sure to Register the letter.

Order Early It is important that you order early. For the benefit of customers who wish to order early, but do not care to spare all of the money when the order is sent, we will accept early orders if 10 per cent of the amount is sent with order, and we will reserve the stock for you. Balance to be sent when you order the stock shipped.

Directions for Ordering Write name and address plainly. Always state distinctly the sizes and grades of stock ordered as per the grades given in this list. When varieties named cannot be furnished, we reserve the right to substitute such varieties as will fill the season as nearly as possible, unless prohibited in the order. Persons unacquainted with the different varieties will generally get a much better selection by leaving the assortment to us. Keep a correct copy of the order, so that when stock arrives you will know exactly whether or not you get what you have ordered. If we make mistakes, they are accidental, and we wish to right them.

Prices The prices are for the quantities named, but five, fifty and five hundred will be supplied at ten, hundred and thousand rates respectively—i. e., five at half the price of ten; fifty at half the price of one hundred, and so on.

The prices in this list are for the goods F. O. B. New Haven, Missouri.

Easy Payments Write for our Easy Payment Plan.

Packing All goods are packed free. Notwithstanding this fact, we use the utmost care and pack all orders, large or small, according to the distance and our customers' best interests. Everything is correctly labeled.

Our Guaranty The fact that nurserymen, planters and fruit growers of the country have ordered of us year after year, is as good a guaranty as can be given by any other nursery of fifty-nine years' standing. If a mistake occurs we will cheerfully correct it. We use the greatest care possible to have our stock true-to-name, and should any prove not true, we stand ready to replace it free of charge, or to refund the purchase price, but it is mutually agreed between the purchaser and ourselves that we shall not at any time be held responsible for any sum greater than the amount originally paid for said stock. We guarantee stock to reach customers in good condition.

All shipments will be accompanied by Certificate of Inspection of the State Entomologist. Good stock, true-to-name, sold direct to the planter at reasonable prices is our aim.

We solicit correspondence and personal inspection of our stock, confident that it will compare favorably with the best.

Our Location NEW HAVEN is on the Missouri Pacific Railroad and also on the Missouri River, sixty-seven miles west of St. Louis. Our soil is the very best for producing well-ripened stock with splendid roots. Our facilities for prompt shipments are first class. Daily Truck Service to St. Louis via Highway No. 66.

Our Shipments Our shipments go to practically every State in the Union. We do not claim you should plant "Bagby-grown stock or none at all," but we do want to impress on you the fact that there is NONE BETTER.

Complete planting directions will be sent with each order.

A Money-Making Orchard

“What Shall I Plant?”

We wish to say that the small-size trees are strictly first-class and well-rooted, and by many will be preferred to the larger ones. So many ask, “What should I plant in my locality?” that we will here name a few of the popular and profitable sorts for general planting.

APPLES

Jonathan, Delicious, Mammoth Black Twig, York Imperial, Winter Banana, Stayman Wine-sap, Rome Beauty, Winesap, Grimes' Golden, Maiden Blush and Yellow Transparent. This is our Commercial List. Others would add, perhaps, Ben Davis, Duchess of Oldenberg, Early Harvest, etc. All of the above are good, profitable sorts, both for home use and market.

PEACHES

If you want to market your fruit, avoid planting too many early sorts. Elberta, J. H. Hale, Carman, Champion, Captain Ede, Heath Cling, Krummel, Gold Dust, Belle Ga. and Crawford are all profitable for market. Should early sorts be desired, Mayflower, Greensboro, Alexander and Red Bird Cling are what you should plant. Plant October Beauty for best late yellow cling. If for home use, plant general assortment, including above, for a succession. The peach tree should have shoots and branches shortened every year or two. The land should be kept in a high state of cultivation.

PEARS

The fact is more and more apparent that Kieffer and Garber will stay in the lead for profit in the Mississippi Valley states. Duchess and Bartlett can be profitably planted farther west. Koonce is the best early Pear.

CHERRIES

Early Richmond, Montmorency, English Morello (Sour), Governor Wood and Magann (Sweet) do very well and are profitable.

PLUMS

Wild Goose (Native), Shropshire Damson, German Prune (European), Abundance and Burbank (Japanese), are all good bearers and profitable. We consider the Abundance and Burbank the best of the well-known Japanese sorts. **BLACK BEAUTY IS THE BEST OF ALL.**

WHOLE ROOT TREES

All our Apple, Pear, Peach, Plum and Cherry trees are grown on “whole roots.” Our Apples are grafted and planted so that the scion also roots. Don't pay extra prices for “trade-marks.” We give our customer the very best, and we don't ask two prices. A trial order will convince you. In planting our trees, you set the best that experience and skilled labor can produce.

Distances for Planting

Standard Apples	30 to 35 feet apart each way
Standard Pears and Strong-growing Cherries.....	20 feet apart each way
Duke and Morello Cherries.....	18 feet apart each way
Standard Plums, Apricots.....	18 to 20 feet apart each way
Peaches, Nectarines	18 to 20 feet apart each way
Dwarf Pears	10 to 20 feet apart each way
Grapes	rows 10 to 16 feet apart, 7 to 16 feet in rows
Currants and Gooseberries.....	3 to 4 feet apart
Raspberries and Blackberries.....	3 to 4 by 5 to 7 feet apart
Strawberries for field culture.....	1 to 1½ by 3 to 4 feet apart
Strawberries for garden culture.....	1 to 2 feet apart

Number of Trees on an Acre

30 feet apart each way.....	50	18 feet apart each way.....	135
25 feet apart each way.....	70	15 feet apart each way.....	205
20 feet apart each way.....	110		

Rule—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill; which, divided into the number of square feet in an acre (43,560), will give the number of plants or trees to the acre.

Proper planting and cultivation with correct pruning and spraying is the best insurance on an orchard.

APPLES

The first fruit, both in importance and general culture, is the Apple. Its period, unlike that of all other fruits, extends nearly or quite through the year. By planting judicious selections of summer, fall and winter sorts, a constant succession of this most desirable fruit will be obtained. Apple planting can never be overdone.

Our apples are all grown on Missouri river upland, on well-branched, whole roots, smooth, clean and well grown in every respect. **No better trees can be found anywhere.**

Summer Apples

BENONI—One of the best summer sorts. Red striped. Flesh yellow, tender, pleasant. Core small. Tree vigorous and upright.

CAROLINA RED JUNE (Red June)—Medium size; red, flesh white; last of June. Tree is very vigorous, upright, an early and abundant bearer.

DUCHESS OF OLDENBURG (Russian)—Medium to large size; skin yellow, streaked with red, somewhat blushed. Productive. August.

EARLY HARVEST—Medium to large, bright straw color; flesh white. Tree moderately vigorous and productive. First of July.

LIVELAND RASPBERRY—Fruit good sized, clear, waxen, white striped and marbled crimson; flesh snow-white, often tinged pink next to the skin, a very popular early summer variety. Blooms late, is blight-resistant, bears early, makes a good filler.

RED ASTRACHAN—Fruit is nearly covered with light and dark red stripes. Large, roundish and very juicy. A good general purpose apple for home use or local market.

Carolina Red June

YELLOW TRANSPARENT—One of the best early apples. It is extremely hardy. Fruit is yellow with a smooth brilliant skin. Flesh is white, fine grained, sub-acid. Tree is a straight compact grower and is often used as a filler.

Fall Apples

Grimes' Golden

GRIMES' GOLDEN—Medium to large; rich golden-yellow; flesh tender, mild, sub-acid. Should be gathered before turning yellow and put in a cool place. Often keeps until February. Tree hardy, vigorous; an early and abundant bearer. October to January.

GOLDEN SWEET—Large pale yellow. Very sweet.

MAIDEN'S BLUSH—Rather large, evenly shaded red cheek or blush on a clear pale yellow ground; bears large crops. August and September.

WEALTHY—An apple of fine appearance and quality; an early and profuse bearer; a good market apple of its season. Tree hardy. Ripens here in August. Winter apple North.

Delicious

Winter Apples

BLACK BEN DAVIS—Ben Davis type. Dark red color.

BEN DAVIS—Fruit medium to large; red striped; flesh white; an excellent variety. Tree very hardy; a free-grower, coming into bearing early and very productive. December to March.

DELICIOUS—A remarkably popular variety, and rapidly taking first rank both for commercial and home orchards in all the apple-growing sections of the country. Fruit large, nearly covered with dull dark red; fine-grained, crisp, juicy; quality best; a splendid keeper and shipper; vigorous grower.

GANO—This apple was introduced to the public in 1886. Tree very hardy; it bears very young. Fruit bright red on yellow ground, no stripes; large; oblong, tapering to the eye; surface smooth, takes a very high polish, making it valuable as a stand fruit; flesh white. Annual, early, prolific bearer.

GENETON (Rawles' Janet)—Medium, roundish, greenish-yellow, striped with red; rich and juicy; one of the best and longest keepers in the South and Southwest; valuable for its high quality and its late blooming; moderate grower. January to March.

HUNTSMAN'S FAVORITE—Originated in Johnson county, Missouri. Very large; golden-yellow, with bright red cheek; nearly sweet, fine flavor, very aromatic. One of the best and highest selling market apples; tree very healthy and productive. November to January.

Winter Apples—Continued

INGRAM—Very similar to Geneton, but tree is more upright grower and apple is not subject to crack. Size medium; striped bright red in the sun. Flesh greenish-yellow; agreeable, sub-acid flavor. Good keeper. Tree hardy, late bloomer, very productive.

JONATHAN—One of our earliest and best bearers. Brings fancy prices. Extra long-life tree. Fruit a brilliant glossy red, with spicy rich acid flavor. Succeeds everywhere. A firm apple, crisp, tender and juicy. A great commercial apple and a splendid family sort.

KING DAVID—Handsome red apple. Some what deeper in color than Jonathan. Snappy flavor. Productive.

MAMMOTH BLACK TWIG—Closely related to the Winesap, but fruit is very much larger and has a very deep red skin. It is an excellent shipper. Its keeping qualities are equal to the Winesap. The tree is a fine upright spreading grower, thriving in almost any soil or climate.

MINKLER—Bright red cheek. One of the very best late keepers. Seedling of Little Red Romanite.

RAMBO—Medium; flat, streaked red and yellow. Very tender and juicy. Hardy and productive.

ROME BEAUTY—Large, yellow shaded with red; tender, juicy, sub-acid. October to February.

STAYMAN WINESAP—Fruit is very large, and of a deep red color. Flesh firm, tender and juicy. It is a wonderful apple for both the home and commercial orchard. Tree is a strong grower and very heavy producer. We recommend this as one of the finest of the winter apples.

Jonathan

Winter Apples—Continued**Winesap**

WILLOW TWIG—Large, pale green, mottled, striped and blushed with red. Tree spreading. Latest winter sort. Bears young.

WINESAP—Few apples have enjoyed the popularity of the Winesap. It is deep red in color, fine flavor and keeps exceedingly well in storage. Fruit is medium size, but takes a high polish and is always in

demand. It is an exceptionally heavy and regular bearer. The tree will succeed in almost every soil and climate.

WINTER BANANA—Fancy market fruit; large, pale yellow, pink blush. Tree a strong grower.

YORK IMPERIAL—This apple has been gaining favor, and is being planted largely as a commercial sort. Large, smooth, yellow, shaded red, with indistinct red stripes.

Crab Apples

Prices for Crab Apples are the same as for other apples.

HYSLOP—Deep crimson. Very popular on account of its large size, beauty and hardiness. Keeps well into the winter.

TRANSCENDENT—Remarkably vigorous, growing to a good size, and immensely productive. Bears a little the second year from planting, and every year after, and produces good crops by the fourth year. The best of its class for cooking and eating; juicy and crisp. Skin yellow, striped with red. September to October.

WHITNEY—Large, averaging 1½ to 2 inches in diameter; skin smooth, glossy green, splashed with carmine; flesh firm, juicy and rich. Very hardy, vigorous, handsome.

YELLOW SIBERIAN—Fruit large, very juicy and excellent for preserves, jelly or pickles.

VISIT OUR NURSERIES during growing, digging or storage season. We welcome you at any time.

**A Plate of New Haven Apples**

Peaches

Three-Year-Old Peach Trees from our Nursery in an Indiana orchard.

We are "Headquarters" for **True-to-Name** Peach Trees, and can supply the best up-to-date market sorts. Our Peaches are stocky, nicely headed, smooth, straight bodies, well rooted, on healthy peach stocks and free from any disease. Remember this when comparing prices with other establishments.

Early Varieties

ALEXANDER (White Free)—Large size, handsome and regular in form, with deep maroon shade; adheres to stone; should remain on the tree until fully ripe. Early in July.

CARMAN (White Semi-cling)—Large with beautifully mottled red cheek. A valuable home or market sort. Season about fourteen days later than Alexander and about three weeks earlier than Elberta. Our stock came from the originator, and is true to name.

GREENSBORO (White Free)—Large, oblong. Tree vigorous, prolific; grown largely in Georgia and the South for Northern markets. One of the best early sorts. Ripe June 25th.

MAMIE ROSS (White Free)—Large, white, almost covered with carmine; juicy, and of good quality. One of the best for family use and probably the best early commercial variety.

MAYFLOWER (Red Semi-cling)—A beautiful "red-all-over" peach; handsome and of splendid quality. Extremely early. Tree hardy and healthy. Ripens here June 20th.

RED BIRD CLING (Early Wheeler) (White Cling)—One of the very best of the early peaches. The tree is hardy, a good grower and very productive. Fruit is a creamy white with a red blush. A splendid shipper, and commands good market prices.

SNEED (White Cling)—Ripens earlier than Alexander, and belongs to an entirely different type. It is very distinct in tree and fruit, belonging to the Chinese Cling type. July.

Carman

Mid-Season Varieties

Champion

BELLE OF GEORGIA (White Free)—Very large; skin white with red cheek; flesh white, firm and of excellent flavor. Tree a rapid grower, very prolific; fine shipper. Ripens with Early Crawford.

CAPTAIN EDE (Yellow Free)—Originated on farm of Capt. Ede in Illinois. Splendid yellow freestone variety. In appearance is very much like Elberta, its equal in every way, except not quite so large; better quality.

CHAMPION (White Free)—Originated at Nokomis, Illinois. Fruit large, beautiful in appearance; flavor delicious, sweet, rich and juicy; skin creamy-white, with red cheek. August 15.

CRAWFORD'S EARLY (Yellow Free)—This beautiful yellow peach is highly esteemed for market purposes. Fruit medium, oblong; skin yellow, with fine red cheek; flesh yellow, juicy, sweet and excellent. Last of July.

CRAWFORD'S LATE (Yellow Free)—Fruit of the largest size; skin yellow, or greenish-yellow, with dull red cheek; flesh yellow; productive; one of the best freestones. August and September.

CHINESE CLING (White Cling)—A most popular peach; shape is oblong, has creamy skin with faint flashes of red. August.

EARLY ELBERTA (Yellow Free)—Resembles Elberta in appearance, but ripens about ten days earlier. Flesh is fine grained and sweet. Excellent for home use or market. August.

ELBERTA (Yellow Free)—A Georgia cross between Crawford Early and Chinese Cling; very large; well colored; all things considered, the finest yellow freestone in cultivation; no one can go amiss by planting it; the fruit is perfectly free from rot, and is one of the most successful shipping varieties. August and September.

ELBERTA CLING (Yellow Cling)—Flesh firm; excellent shipper. Tree strong grower and productive. Looks just like Elberta, but a perfect cling stone.

J. H. HALE (Yellow Free)—Similar in shape to the Elberta, but averages a little larger. Flesh fine grained of excellent flavor and a perfect free stone. Ripens a few days after Elberta. It is a wonderful peach for either home or commercial orchard, as it is very productive and a good shipper.

HILEY (White Free)—Ripens last of July. Yellowish-white skin with deep red cheek. Flesh is white and very juicy. Large size.

MATTHEW'S BEAUTY (Yellow Free)—Fully as large as Elberta, but about two weeks later. A splendid shipper and home orchard variety. September.

MILLER CLING (White Cling)—An extra large clingstone. Hardy, productive, and of best quality. Earlier than Heath Cling, but larger and better color.

OLD MIXON CLING (White Cling)—Large, white flesh, with deep red cheek; rich and good; one of the best. August.

ROCHESTER (Yellow Free)—Ripens ahead of Early Crawford, but is of the same type. Long season and an excellent home orchard variety. Flesh firm, juicy and rich.

SOUTH HAVEN (Yellow Free)—Fruit large, round and of uniform size. Color deep yellow with red cheek. Very hardy.

YELLOW ST. JOHN (Yellow Free)—Medium size. Yellow free with red blush. Flesh tender; juicy and very good quality. Tree strong grower and heavy bearer. Middle of August.

WHEATLAND (Yellow Free)—Large, roundish, skin golden yellow, shaded with crimson on the sunny side. Flesh yellow and of fine quality. Ripens just ahead of Elberta. August.

Elberta

Late Varieties

GOLD DUST—Large yellow clingstone; juicy, productive and of best quality. September 1st to 10th.

HEATH CLING (White Cling)—Large oblong, creamy-white, slightly tinged with red in the sun; very tender, juicy, melting; very rich and luscious. September 15th.

HENRIETTA (Levy) (Yellow Cling)—Magnificent yellow cling, large size, slightly covered with bright crimson; hardy, productive, always commands fancy prices. September 25th.

KRUMMEL (Yellow Free)—Skin yellow, overlaid with a crimson blush. The fruit

is nearly round and quite large. Flesh is fine grained and has a delicious flavor. September 10th to 25th.

OCTOBER BEAUTY (Yellow Cling)—Late yellow cling. Originated on the grounds of Judge Hugo Muench of St. Louis. We recommend it as the best late yellow cling.

PICQUET'S LATE (Yellow Free)—A variety of large size, yellow, with red cheek; flesh yellow. September.

RINGGOLD CLING (White Cling)—Much larger than Heath, and in every way an improvement on that popular kind. A very valuable peach. September.

STUMP (White Free)—Late freestone of very fine quality. September.

ABUNDANCE—A hardy, productive Japanese sort. Large, purplish-red; quality very best. Season, early in July.

AMERICA—Large, glossy red. Tree large and vigorous; hardy; bears young. Enormous cropper. Does well anywhere.

BLACK BEAUTY—The best Japan sort we have ever grown. Large, very dark purple, almost black. Persimmon shape. Quality and size of Abundance. Originated with us.

BURBANK—Large, varying less in size than the other Japanese plums; it is nearly globular; clear cherry-red with a thin lilac bloom; flesh deep yellow, firm and meaty; tree vigorous and productive. Last of July.

GERMAN PRUNE — Very profitable and will succeed wherever Common Damson can be grown. Very large. We consider it the best of European sorts. August and September.

GONZALES — Large red plum. Midseason.

HANSKA (Hansen Hybrid)—Good eating plum. Bright red.

RED JUNE—One of the largest Japanese varieties; ripens before Abundance. Tree upright, vigorous and hardy.

SHROPSHIRE DAMSON—A plum of fine quality, sprightly. In market it has commanded nearly double the price of the Common Damson; enormously productive. Last of September.

WANETA (Hansen Hybrid)—Dark purplish red. Delicious flavor. Trees small.

WILD GOOSE—Large, rich, crimson, beautiful; flesh soft, melting delicious, with a full fruity flavor. Tree a strong grower, prolific.

For the Home Orchard, plant Abundance, Burbank, Black Beauty and Shropshire Damson.

Shropshire Damson

Pears

Our pears are especially clean, smooth and well rooted, grown on XX French imported stocks.

Summer Pears

BARTLETT—Large, skin very thin, clear lemon-yellow, with soft blush on the sunny side; flesh white, buttery, very juicy and highly flavored. The best summer pear in existence for quality.

KOONCE—The handsomest, best and most valuable; very early pear; tree vigorous, upright grower, free from blight; magnificent foliage, which it retains late in the season; fruit medium to large; skin yellow, does not rot at the core, juicy, sweet. Is an excellent shipper.

SECKEL (Little Sugar Pear)—Small, rich, yellowish brown with bright red cheek. Juicy, buttery and melting.

Autumn Pears

FLEMISH BEAUTY—Large, beautiful, juicy, melting, rich and fine; strong grower and good bearer; hardy everywhere September and October.

GARBER — Originated in Pennsylvania. Fruit is large and beautiful; color bright yellow, with red; juicy and good; delicious canned.

KIEFFER—Tree a remarkable grower, with so vigorous a constitution that it rarely blights. Fruit of fine size, rich color and good quality. Brings high prices in competition with other varieties. Best when picked at maturity and house-ripened October and November.

Ballard, Co., Ky., April 4, 1930.

Trees shipped March 22, 1930, arrived all right. Look good. H. N. SANFORD.

Jasper Co., Ind., February 16, 1930.

I have good luck with your trees. Of the 2,000 trees in this neighborhood that are from your nursery, there are not over 100 trees to be replaced in five years.

CHAS. E. MARSHALL.

Lincoln Co., Mo., April 7, 1930.

Plants reached me in fine shape, and I think they are the best I ever saw.

C. P. WARD.

Kearney Co., Kans., May 2, 1930.

Trees and shrubbery arrived in good condition. S. E. WOOD.

Bernalillo Co., N. Mex., April 14, 1930.

The trees you sent me three years ago are growing fine and this year they are blooming. Some of them are ten feet high and I am proud of them. FRED GRINER.

Kieffer

Cherries

There are few more desirable fruits than Cherries, and they can be grown for market with great profit. Along the street or avenue as ornamentals; they are strong, vigorous growers, with large, glossy leaves and open, spreading heads, making a fine shade. Cherries thrive in almost any well-drained soil. The fruit is equally delicious whether eaten from the tree or preserved, and it will always find a ready market at profitable prices.

BLACK TARTARIAN—Sweet. Large size, meaty and good. Productive. Last of June.

ENGLISH MORELLO—Medium to large, blackish-red; acid; juicy. Very productive. Short lived. July.

EARLY RICHMOND (Kentish Virginian or Early May)—Medium size; red; melting, juicy, sprightly, acid flavor. This is one of the most valuable and popular of the acid cherries, and is exceedingly productive. First of June.

GOV. WOOD—One of the best sweet cherries, very large, white with pink cheek. Juicy, rich and delicious. Tree healthy and a great bearer. May and June.

MAGANN—A sweet cherry. Fruit large, almost black when fully ripe, growing in large clusters. It will pay you to include some of these in your order for other stock.

MONTMORENCY—One of the finest acid cherries; tree very hardy and an immense bearer; commences to fruit while young and is loaded annually thereafter with fine crops; fruit of good size, fine flavor, and of bright, clear, shining red; valuable everywhere, especially for Northern latitudes; larger than Early Richmond, and fully ten days later. Season, end of June.

WASHINGTON—1 year.
Price.....\$2.00 per 100

Shade and Ornamental Trees

CATALPA BUNGEI (Umbrella Catalpa)—

Grafted on straight stems, it makes an umbrella-shaped top without pruning. Perfectly hardy, and flourishes in all soils and climates.

	Each	10
5 to 7 feet.....	\$1.00	\$8.00
4 to 5 feet.....	.80	7.00
3 to 4 feet.....	.70	5.00

CATALPA (Speciosa)—Hardy Catalpa. Has very large, broad leaves and fragrant purplish white blossoms. Excellent for post timber as it is very resistant to rot.

	Each	10
6 to 8 feet.....	\$0.50	\$4.00

ELM (American)—A native tree of large size. Wide spreading head and graceful drooping branches. A hardy grower. One of the best park and street trees.

	Each	10
6 to 8 feet.....	\$0.80	\$6.50
8 to 10 feet.....	1.00	8.00

ELM (Chinese)—A hardy, rapid grower. Slender branches, compact habit of growth with small attractive leaves. Highly recommended for dry climates.

	Each	10
8 to 10 feet.....	\$1.00	\$8.00

MAPLE (Soft)—A native tree of very rapid growth. Hardy everywhere and easily transplanted. Leaves are finely cut, bright green on upper and whitish on lower side.

Soft Maple

	Each	10
8 to 12 feet.....	\$1.00	\$8.00
6 to 8 feet.....	.75	6.00

POPLAR (Chinese)—Hardy, pyramidal tree. Habits similar to Lombardy. Foliage not as dense and lighter color.

	Each	10
6 to 8 feet.....	\$0.75	\$6.00

POPLAR (Lombardy)—A tall, rapid grower. Always makes a striking feature in any landscape. For tall screens and back-grounds, this tree is admirable.

	Each	10
6 to 8 feet.....	\$0.60	\$5.00

PUSSY WILLOW—Very popular for ornamental purposes because of the attractive catkins formed on the branches early in the Spring.

	Each	10
3 to 4 feet.....	\$0.60	\$5.00

RUSSIAN MULBERRY.

	Each	10
4 to 6 feet.....	\$0.60	\$5.00

SYCAMORE—One of the tallest of our native trees. Very shapely and much admired because of its white spotted bark. One of the best trees for cities.

	Each	10
5 to 6 feet.....	\$1.00	\$8.00

TULIP TREE—A tall, robust tree of magnificent appearance. Leaves of unusual form. The blossoms are tulip-like in shape.

	Each	10
5 to 6 feet.....	\$0.80	\$7.00

WILLOW, WEEPING (Wisconsin)—The hardiest of all Weeping Willows. Beautiful form. Grows to very large size.

	Each	
4 to 6 feet.....	\$1.50	

Lombardy Poplar

Ornamental Shrubs

Spirea Van Houttei

- ALTHEA** (Hibiscus, or Rose of Sharon)—Handsome, late, summer-flowering shrub. Assorted colors. Each 10
2 to 3 feet.....\$0.40 \$3.50
- BARBERRY** (Thunbergii)—A very valuable low growing shrub; perfectly hardy. Small green leaves changing to red in fall. Twigs thorny and covered with red berries in the Fall and Winter. Each 10
18 to 24 inches.....\$0.35 \$3.00
- BARBERRY** (red leaf)—Similar to the green leaved Barberry but the foliage is of a rich, lustrous, bronzy-red, which becomes even more brilliant as the season advances. Each 10
18 to 24 inches.....\$0.75 \$6.00
- BUTTERFLY BUSH**—Very fast growing shrub, with brilliant foliage. Grows well in any well drained soil, but needs plenty of sunlight. Each 10
2 to 3 feet.....\$0.40 \$3.50
- COTONEASTER**—A handsome fruiting shrub, with brilliant foliage. Grows well in any well drained soil, but needs plenty of sunlight. Each 10
18 to 24 inches, balled and burlapped, each.....\$1.00
- DEUTZIA** (Crenata)—Foliage light green; flowers double white, outside tinged with rose. Each 10
2 to 3 feet.....\$0.40 \$3.50
- DEUTZIA** (Pride of Rochester)—Flowers pure white, double, tinged with pink. Profuse bloomer. Tall shrub. Each 10
2 to 3 feet.....\$0.40 \$3.50
- DEUTZIA, ROSEA**—Double white, tinged with pink. Each 10
2 to 3 feet.....\$0.40 \$3.50
- DOGWOOD** (Coral)—Free growing, 6 to 8 feet; hardy, white berries in the fall. Stems are red which make a very valuable plant for winter effect. Each 10
2 to 3 feet.....\$0.50 \$4.00
- DOGWOOD** (Sanguinea)—Flowers greenish white followed by white berries. Deep red bark. Low branching shrub. Broad foliage. Each 10
2 to 3 feet.....\$0.50 \$4.00
- FORSYTHIA** (Golden Bell)—A spreading bush with dark, shining foliage. Deep yellow flowers appear before the leaves. Each 10
3 to 4 feet.....\$0.50 \$4.50
- HYDRANGEA** (Arborescens Grandiflora) (Hills of Snow)—Blossoms large, snow white. Blooms from June to September. Each 10
2 to 3 feet.....\$0.45 \$4.00
- HYDRANGEA** (Paniculata Grandiflora)—Blooms early in August and continues until freezing weather. White, turning to pink. Each 10
2 to 3 feet.....\$0.50 \$4.50
- LILAC** (White)—When planted with purple makes a very desirable contrast. Each 10
2 to 3 feet.....\$0.60 \$5.00
- LILAC** (Purple)—A good grower. Flowers and young wood fragrant. Each 10
2 to 3 feet.....\$0.60 \$5.00

Ornamental Shrubs—Continued

MOCK ORANGE (*Philadelphus*)—Flowers white. Deliciously perfumed. Flowers resemble orange blossoms. Each 10

2 to 3 feet.....\$0.40 \$3.50

PRIVET (*California*)—A vigorous-growing variety of fine habit; thick; glossy. The finest of ornamental hedge plants.

Spraying

Spraying is a vital necessity if you want GOOD Fruit. It doesn't pay to miss one season, even if enemies are not visible. Spraying has an invigorating effect on trees, besides controlling enemies.

Spraying during the dormant period is distinctly different from spraying on foliage. Materials several times as strong can be used and are needed to control the scales.

On account of the life habits of enemies, often only two to seven days are available for any one spraying. Do the work then. Put the material on with force and cover every inch of bark and leaf.

Get a sprayer that is big enough, that will give one hundred to two hundred and fifty pounds of air pressure, that is adapted to your land and trees, and that is durable. Get a power outfit, if possible, for it does better work than a hand pump can.

The Spraying program ordinarily resolves itself into two, three or four applications, one while trees are dormant with SCALECIDE, and the others on blossoms and fruit with SULFOCIDE. All applications must be guided by careful study.

Spraying will pay bigger dividends than anything you can do. Anything that is worth having is certainly worth taking care of.

BORERS WILL ATTACK FRUIT TREES IN SPITE OF ALL WE CAN DO, and will kill many trees if left alone. Trees must be gone over several times each year, and should be gone over each April and August.

Spray Materials

SCALECIDE
—THE COMPLETE DORMANT SPRAY—
Costs More Per Gallon - but Costs No More Per Tree

Scalecide is truly the complete dormant spray. Applied in the fall it controls scale of all kinds, bud-moth, pear psylla, peach leaf-curl, and fungous cankers. The delayed dormant spray with Scalecide controls scale, aphids, pear thrips, leaf miner, case bearer, leaf roller European red mite, bud-moth, and fungous cankers. And in addition year after year use of Scalecide invigorates the trees. Scalecide is guaranteed to make a better orchard than lime-sulfur.

Scalecide is pleasant to use; it does not injure even the eyes. It is non-poisonous. It saves half the labor of spraying—a tankful of dilute Scalecide goes as far as two tankfuls of dilute lime-sulfur. Scalecide saves the cost of nicotine; saves the cost of spreader; saves more than three-fourths the freight and haulage. A fifteen-gallon drum of Scalecide covers the same trees as a fifty-gallon barrel of lime-sulfur.

PROPORTIONS

For small quantities of spray solution, these figures will help you to get the proper mixture. Be accurate.

MATERIAL

Scalecide—Dilution recommended, 1 gallon to 15 gallons of water. 3 cupsful (1½ pints), equivalent for 3 gallons of water.

Sulfocide—Dilution recommended, 1 gallon to 200 gallons of water.
4 tablepoonsful (2 ounces), equivalent for 3 gallons of water.

PRICES

F. O. B. NEW HAVEN, MO.

SULFOCIDE
A Better Summer Spray

Sulfocide is a highly concentrated non-poisonous liquid sulfur fungicide—entirely distinct from lime-sulfur. Within a few minutes after the spray is applied and before it is dry, Sulfocide is decomposed by the action of the air leaving a film of extremely fine sulfur in its most active fungicidal form.

Briefly these are the reasons why Sulfocide is a better summer spray: it does not russet apples (bordeaux does); it does not devitalize foliage and dwarf the fruit (lime-sulfur does); it can be used on both peaches and apples and on all kinds of fruits and vegetables (no other fungicide can). It imparts to fruit a beautiful luster and finish. It costs no more than home-made bordeaux.

AMOUNTS OF DILUTE SPRAY REQUIRED

These figures will be fairly accurate for both Scalecide as a dormant spray and Sulfocide as a summer spray.

2 to 5-year-old trees.....	½ to ¾ gal.
6 to 8-year-old trees.....	¾ to 1 gal.
9 to 13-year-old trees.....	1 to 1¾ gal.
14 to 18-year-old trees.....	2 to 2½ gal.
19 to 24-year-old trees.....	3 to 3½ gal.
25 to 30-year-old trees.....	3½ to 4 gal.

About Agents

This Price List is our Agent, but we shall be pleased to have you secure orders from your neighbors on Club Lot basis. On Club Orders amounting to \$25.00 or more, on orders at the single, ten and hundred rates, we will allow you 10% additional in stock. It should be very easy for you to get the stock you want absolutely free by getting your neighbors to let you send us their orders. We put up each order in a separate package, so that upon receipt of goods you have only to hand out the different lots as ordered. Special prices will be made on larger quantities than indicated in this list.

THE MISSOURI STATE BOARD OF AGRICULTURE

Office of the Plant Commissioner
Jefferson City

CERTIFICATE OF NURSERY INSPECTION

No. 47

Issued July 29, 1930.

THIS IS TO CERTIFY that, in accordance with the provisions of the Missouri Plant Act of 1929, the nursery and premises thereof belonging to New Haven Nurseries of New Haven, Mo., have been inspected by a duly authorized inspector and were found to be apparently free of injurious insect pests and plant diseases.

This certificate is not transferable and may be revoked for cause. This certificate expires September 1, 1931.

K. C. SULLIVAN, Plant Commissioner.

We are prepared to fumigate all consignments to states requiring fumigation. No Scale or Yellowing has ever been found in our establishment, and we take pride in sending out only clean, healthy stock.

It Pays to Plant
